DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, and 6 – 12 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 6 and 11, the Applicant has amended the claims to be rewritten in independent form in light of previous Office Actions indication of allowable subject matter. Regarding claims 1, 9, and 10, the Applicant has persuasively argued two key points: First, the prior art does not teach a calculator which calculates a correlation coefficient based on amount change in a root chord and an attribute indicating a type of chord after each transition. While it is true that the prior art discloses calculating a "coincidence flag" (i.e., a "1" if a match is found and a "0" if not match is found). The Examiner finds it important that the prior art calculation is not based on "amount change in a root chord" and "an attribute indicating a type of chord." Second, the Applicant's invention will "produce an output indicating at least one music piece of said plurality of music pieces in accordance with the correlation coefficient." In contradistinction, the prior art may not produce any result (e.g., all coincidence flags could be "0") if not match is found.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
